SUBJECT: Total Halogenated Hydrocarbon Analysis of Hoquium
Sanitary Landfill, Hoquium, Greys Harbor County

Two water samples collected on December 3, 1984 were received at the Manchester Environmental Laboratory on December 5, 1984 for total Halogenated Hydrocarbon Analysis, (TOX). The TOX procedure is limited to drinking water and ground water and is not designed for use with landfill leachates containing particulate matter. Consequently purgeable halocarbon analysis was substituted for the requested analysis to provide equivalent results. The results of the analysis are given below.
